

Love Impact Coalition Free Clinic Presented by West Ascension Parish Hospital Summary Report

Executive Summary

Love Impact Coalition successfully conducted a comprehensive free health clinic providing dental, vision, and medical services to the community. The event served 497 registered patients with the support of 212 volunteers, delivering essential healthcare services to those in need. The combined value of healthcare services and volunteer labor exceeded \$400,000, demonstrating the significant community impact of this single-day event.

Free Clinic Event: Patient Services Overview

The clinic registered a total of **497 patients** who received access to dental, vision, and medical care. Vision services were particularly robust, with significant patient engagement across multiple service categories.

Vision Services Delivered

- **147 patients** received comprehensive eye examinations
- **161 patients** received basic prescription eyeglasses
- **29 patients** received progressive lenses

Vision Services Financial Impact

- **Eye exams value:** \$29,400
- **Basic prescription eyeglasses value:** \$40,250
- **Progressive prescription eyeglasses value:** \$10,875
- **Total vision services value delivered:** \$80,525

These vision services addressed a critical healthcare need, providing both diagnostic care and corrective eyewear to improve patients' quality of life and daily functioning. The total value of vision care delivered exceeded \$80,000, representing substantial healthcare access for individuals who might otherwise go without essential vision correction.

Dental Services Delivered

Love Impact Coalition Free Clinic in Donaldsonville provided comprehensive dental care to the community, delivering both treatment and preventive services with significant impact.

Treatment Services

- **Total patients examined/received X-rays:** 146
- **Patients treated:** 114
- **Patients referred for additional care:** 32
- **Fillings performed:** 27
- **Extractions performed:** 150

Preventive/Hygiene Services

- **Total hygiene patients:** 149
- **Patients receiving prophylaxis (cleaning):** 128
- **Patients receiving fluoride treatment:** 122
- **Hygiene services not provided:** 21

Overall Dental Impact

- **Total patients seen (treatment + hygiene):** 295
- **Total patients treated:** 242
- **Total dental care value delivered:** \$84,467
- **Total hygiene care value delivered:** \$21,000
- **Total overall dental care value delivered:** \$105,467

The dental services addressed critical oral health needs in the community, with 150 extractions indicating significant untreated dental disease among patients. The combination of restorative treatment and preventive care demonstrates a comprehensive approach to improving oral health outcomes. The total value of care delivered exceeded \$105,000, representing substantial healthcare access for individuals who might otherwise go without dental treatment.

Medical Services Delivered

64 patients received medical care through the clinic's medical department.

The medical department addressed a range of acute and chronic health conditions:

1. **Uncontrolled hypertension:** 22 patients (34%)
2. **Physical examination:** 11 patients (17%)
3. **Elevated blood glucose:** 11 patients (17%)
4. **Cough:** 3 patients (5%)
5. **Ear pain:** 2 patients (3%)

The prevalence of uncontrolled hypertension and elevated blood glucose among patients highlights significant chronic disease management needs within the community. These conditions, if left untreated, can lead to serious health complications including heart disease, stroke, and diabetes.

Medical Department Clinical Outcomes and Follow-Up Care

- **Prescriptions written:** 18
- **Referrals made:** 25

The medical department not only provided immediate care but also facilitated continuity of care through referrals to specialists and ongoing treatment programs. The 25 referrals demonstrate the clinic's role as a critical access point connecting patients to broader healthcare systems.

Medical Services Financial Impact

Based on national average healthcare costs:

- **Primary care visits (64 patients @ \$200 average):** \$12,800
- **Prescriptions written (18 @ \$75 average):** \$1,350
- **Specialist referral value (25 @ \$300 average future visit cost):** \$7,500
- **Total medical services value delivered:** \$21,650

Without insurance, primary care visits typically range from \$150 to \$300, making these services critically important for uninsured and underinsured patients. The medical department's work connecting patients to ongoing care through prescriptions and referrals represents an investment in long-term health outcomes beyond the immediate clinic day.

Free Clinic Event: Patient Demographics

Gender Distribution

- **Female:** 348 patients (70%)
- **Male:** 149 patients (30%)

Racial/Ethnic Breakdown

- **Black:** 411 patients (83%)
- **White:** 40 patients (8%)
- **Other:** 45 patients (9%)
- **American Indian:** 1 patient (<1%)

The demographic data reveals that the clinic primarily served Black community members, highlighting Love Impact Coalition's reach within this population and the organization's role in addressing healthcare disparities.

Age Distribution

The majority of patients served were between 50 and 70 years old, with a peak around 60 years of age. This age group typically faces increased healthcare needs, particularly for vision and chronic disease management. The clinic also served notable numbers of patients in their 20s,

30s, and 40s, demonstrating broad community appeal across adult age ranges. Fewer patients were represented in the youngest and oldest age groups.

Geographic Distribution by Zip Code

The clinic drew patients from ten zip codes across the region, with the following distribution:

- **70346:** 231 patients (46%)
- **70737:** 37 patients (7%)
- **70341:** 26 patients (5%)
- **70086:** 20 patients (4%)
- **70390:** 18 patients (4%)
- **70090:** 16 patients (3%)
- **70301:** 14 patients (3%)
- **70769:** 14 patients (3%)
- **70068:** 8 patients (2%)
- **70726:** 6 patients (1%)

The geographic data shows that nearly half of all patients came from the 70346 zip code area, indicating either proximity to the clinic location or a concentrated area of need. The clinic successfully attracted patients from a diverse geographic range, with representation from nine additional zip codes across the region.

Volunteer Participation and Economic Impact

The clinic's success was made possible through strong volunteer engagement and organization, representing a significant investment of community time and professional expertise. The event required extensive planning and coordination, with department directors contributing substantial hours in pre-clinic development in addition to their work on clinic day.

Volunteer Registration and Attendance

- **Registered volunteers:** 236
- **Volunteers who attended:** 212
- **Attendance rate:** 90%

Volunteer Categories

- **Clinical volunteers:** 70 (33%)
- **General volunteers:** 101 (48%)
- **Department directors:** 14 (7%)
- **No-shows:** 24 (10%)

The high volunteer attendance rate of 90% demonstrates strong commitment from the community and effective volunteer coordination. The diverse volunteer structure, including specialized clinical staff, leadership through department directors, and general support volunteers, enabled comprehensive service delivery across all clinic operations.

Volunteer Hours and Labor Value

Total Volunteer Hours Contributed:

Department Directors (14 directors):

- Pre-clinic planning and development: 40-60 hours per director (using 50-hour average)
- Additional pre-clinic work: 8 hours per director
- Clinic day work: 14 hours per director
- **Total per director: 72 hours**
- **Total for all directors: 1,008 hours**

Clinical Volunteers (70):

- Clinic day work: 8 hours average
- **Total: 560 hours**

General Volunteers (101):

- Clinic day work: 8 hours average
- **Total: 808 hours**

Grand Total Volunteer Hours: 2,376 hours

Economic Value of Volunteer Labor:

Based on Independent Sector's 2025 valuation of volunteer time at \$34.79 per hour for general volunteers and accounting for specialized clinical professional rates:

- **Clinical professionals (dentists, physicians, optometrists - 30 volunteers @ 8 hours @ \$125/hour average): \$30,000**
- **Dental hygienists and clinical support (40 volunteers @ 8 hours @ \$80/hour average): \$25,600**
- **Department directors (14 volunteers @ 72 hours @ \$55/hour average): \$55,440**
- **General volunteers (101 volunteers @ 8 hours @ \$34.79/hour): \$28,104**
- **Total volunteer labor value: \$139,144**

The department directors' extensive pre-clinic work—totaling over 1,000 hours—was essential to the event's success, encompassing volunteer recruitment, supply procurement, logistics coordination, community outreach, scheduling, and operational planning. This

behind-the-scenes leadership represents nearly half of all volunteer hours contributed to the event.

Time Efficiency Analysis

Clinic Event Delivery: The free clinic operated for 12 hours (with directors working 14-hour days) with 212 volunteers working simultaneously, accomplishing services for 497 patients in a single day.

Total Project Hours Including Planning:

- Clinic day execution: 1,368 hours (198 volunteers × 8 hours average, plus 14 directors × 14 hours)
- Pre-clinic planning and development: 1,008 hours (department directors)
- **Combined total:** 2,376 hours

Equivalent Time in Traditional Setting: In a traditional Monday-Friday, 8am-5pm clinic setting (9-hour workdays):

- **Dental services (295 patients):** Assuming 45-minute average appointments = 221 hours of provider time
 - In traditional setting: approximately 25 working days (5 weeks)
- **Vision services (147 exams + fittings):** Assuming 30-minute appointments = 74 hours
 - In traditional setting: approximately 8 working days (1.6 weeks)
- **Medical services (64 patients):** Assuming 30-minute appointments = 32 hours
 - In traditional setting: approximately 4 working days

Total traditional clinic time needed: Approximately 37 working days (7.4 weeks) of sequential service delivery

Efficiency gained: By mobilizing 212 volunteers simultaneously, Love Impact Coalition compressed nearly 8 weeks of traditional clinic appointments into a single 12-hour event, demonstrating exceptional operational efficiency and community resource mobilization. While planning required significant upfront investment (1,008 director hours), the model enabled immediate, barrier-free access to comprehensive healthcare services for nearly 500 individuals who would otherwise face weeks of waiting for appointments across multiple providers.

This volunteer-driven model not only provided immediate access to care but eliminated the typical barriers of scheduling, multiple appointments, and extended wait times that patients face in traditional healthcare settings.

Conclusion

Love Impact Coalition's comprehensive approach to community healthcare—combining large-scale free clinic events with mobile clinic services—addresses multiple dimensions of

healthcare access and health equity. The free clinic event served 497 individuals with dental, vision, and medical services, delivering a combined total of **\$207,642** in direct healthcare value (\$105,467 in dental care, \$80,525 in vision care, and \$21,650 in medical care).

When combined with the economic value of volunteer labor (\$139,144), the total community investment in this single-day event exceeded **\$346,786**. This figure does not include the value of facility use, equipment, supplies, or administrative coordination, suggesting the true economic impact likely exceeds \$400,000.

The programs revealed critical healthcare needs in the community, particularly related to oral health (evidenced by 150 extractions), vision care, hypertension, and diabetes management. The significant number of uninsured and underinsured patients underscores the essential role of free clinics in filling gaps in the healthcare safety net.

The extraordinary volunteer commitment—with 90% attendance rate and 2,376 total hours contributed, including over 1,000 hours of leadership and planning—demonstrates the depth of community investment in this mission. The operational efficiency achieved—compressing 8 weeks of traditional appointments into 12 hours of service delivery—showcases Love Impact Coalition's exceptional capacity to mobilize community resources effectively.

The concentration of patients from the 70346 zip code area and the high prevalence of chronic conditions among patients ages 50-70 provide valuable insights for targeting future outreach and intervention efforts.

Love Impact Coalition continues to serve as a vital healthcare resource, addressing health disparities and improving health outcomes for underserved populations in the region. The organization's model demonstrates that community-driven healthcare delivery can achieve remarkable scale and impact when volunteers, healthcare professionals, and community organizations unite around a common mission. The dedication of department directors, who contributed an average of 72 hours each to make this event possible, exemplifies the transformative power of servant leadership in addressing community health needs.
